(54) **Tanning booth having automated spray**

(57) A spray chamber (15) has a spray system and a ventilation system. The spray system includes a compressor and stationary spray jets (17) that are positioned 360° about a user, from head to toe. The spray system operates in a spray mode and a drying mode. In the spray mode, the composition is sprayed onto the user through the spray jets in the form of a mist (19). In the drying mode, air is blown through the jets to dry the user. The spray chamber (15) also has a shower spray. In the rinse mode, chlorinated water is emitted from the shower spray to disinfect the spray chamber (15). The ventilation system includes exhaust fans that operate in the drying mode to draw air and remnant spray mist (19) into a ventilation housing. The spray is filtered to create droplets that are siphoned by a sump pump (25) as waste to a sewer system.

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 02 00 9956

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.  
The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
